

## Price Revision Announcement

Greater Noida, India | 6 March 2026

Toyo Ink India Pvt. Ltd. announces a revision in product pricing in response to the continued rise in input costs and foreign exchange fluctuations due to global tensions.

Over the recent period, the company has experienced a significant and sustained increase in the cost of key raw materials along with continued volatility in foreign exchange rates, which has substantially impacted on overall sourcing and production costs.

The major cost escalations affecting industry include:

### 1. Raw Materials:

- **Refined Soya Oil:** Prices have increased due to strong import demand, increased usage for biodiesel production, supply-side constraints, and global market dynamics. Geopolitical factors and currency volatility have further added to the cost pressure.
- **Linseed Oil:** Prices have increased primarily due to reduced crop availability, higher seasonal demand during winter, and the overall upward movement in edible oil prices.
- **Phenolic Resin:** Prices have increased, driven by higher phenol raw material costs, strong demand from other consumer industries, and supply chain disruptions.
- **Solvents:** Solvent prices have seen a steady increase due to fluctuations in petrochemical feedstock costs and supply-demand dynamics.
- **Pigments:** Prices have increased due to rising raw material costs and supply chain constraints.
- **Monomers:** Prices have increased significantly due to supply constraints and rising upstream raw material costs.
- **Polyols:** Prices have increased due to rising upstream raw material costs and tight supply conditions in the global market.

### 2. Packing Materials:

- **Packing Materials:** Costs have increased due to higher prices of packaging inputs, including plastics, metals, and paper-based materials, along with increased manufacturing and logistics expenses.

### 3. Factory Overheads:

- **Overheads:** Manufacturing overheads have increased significantly due to the ongoing shortage in gas supplies, resulting in higher energy and operational costs.

### 4. Foreign Exchange:

- **Foreign Exchange Impact:** Over the last year, the United States Dollar–Indian Rupee and Chinese Yuan–Indian Rupee exchange rates have increased, significantly impacting the cost of imported raw materials and intermediates.

### 5. Logistics:

- **Freight and Forwarding:** Logistics and freight costs have increased due to higher transportation charges, fuel costs, and global supply chain pressures.

Despite continuous efforts to optimize operations and absorb these cost increases wherever possible, the cumulative impact has made price revision unavoidable. While the company has absorbed a portion of these increases to an extent feasible, the continued escalation necessitates a revision.

Toyo Ink India Pvt. Ltd. sincerely appreciates the understanding and continued support of our valued customers and partners.

Guided by the artience Brand Promise of “creating value that resonates with the senses,” Company aims to deliver consistent quality products, ensuring reliable supply, and maintaining the highest standards of service to create lasting value for customers and partners.

Further details regarding the revised pricing structure and effective date will be communicated directly to customers by the respective sales teams.
